

MUHAMMAD HAROON

SENIOR SOFTWARE ENGINEER | FULL-STACK LARAVEL & NEXT.JS DEVELOPER

Faisalabad, Pakistan · +92 304 9298662 · mrharoon4260@gmail.com
linkedin.com/in/muhammad-haroon-79073622b · github.com/muhammad-haroon-001

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years building scalable multi-tenant SaaS platforms, high-availability REST APIs, and production AI systems. Specialized in Laravel, Next.js, and React, with hands-on ownership of cloud infrastructure using Ploi, Cloudways, and Hetzner — including server provisioning, Nginx, SSL, queue workers, and zero-downtime Git deployments. Recently architected Nilaq, an omnichannel customer-engagement SaaS, and TUSO, a RAG-powered conversational AI agent with long-term memory, tool calling, and multi-provider LLM orchestration. Strong in system design, database optimization, webhook integrations, and shipping secure, real-time production software.

CORE COMPETENCIES

SaaS Architecture · Multi-Tenant Systems · REST API Design · Microservices Integration · RAG / LLM Orchestration · Real-Time Messaging (WebSockets) · CI/CD & Server Provisioning · Queue Workers & Event-Driven Workflows · Database Design & Query Optimization · Webhook & Third-Party API Integration · Production DevOps & Observability

TECHNICAL SKILLS

Backend	Laravel, PHP, Express.js, Laravel Sanctum, Laravel Reverb, Eloquent ORM, Queue Workers, Supervisor
Frontend	React, Next.js, TypeScript, JavaScript, Tailwind CSS, Real-time UI (Echo / Pusher)
Databases	MySQL, PostgreSQL, pgvector, SQLite, Redis
AI & Platforms	OpenAI, Anthropic, Google Gemini, DeepSeek, OpenRouter, RAG, Qdrant, Vector Search, Tool Calling
Integrations	Twilio (SMS / Voice / WhatsApp), Meta WhatsApp Cloud API, Telegram Bot API, Infobip, Webhooks
Cloud & DevOps	Ploi Server Management, Cloudways, Hetzner, Nginx, Apache, SSL/TLS, CI/CD, Git Deployments, CDN
Tools	Git, GitHub, Bitbucket, Linux Administration, API Security, Multi-tenant Architecture

PROFESSIONAL EXPERIENCE

Senior Laravel & Next.js Developer — Skyinfinitt

- Architected and scaled enterprise web applications with Laravel, Next.js, and React, covering SaaS products, internal HRM systems, and real-time collaboration platforms.
- Owned production infrastructure with **Ploi**, Cloudways, and Hetzner: server provisioning, Nginx/PHP-FPM, SSL certificates, firewall hardening, Supervisor queue workers, cron jobs, automated backups, and zero-downtime Git deployments.
- Designed and integrated LLM/AI APIs, custom automation workflows, and image-recognition modules into production applications.
- Led end-to-end delivery from API design and database modeling through frontend implementation, performance tuning, and production release.

Laravel Developer — Enzipt

- Engineered RESTful APIs powering consumer-facing AI tooling and data-processing products, with a focus on reliability, authentication, and throughput.
- Maintained, debugged, and optimized 10+ high-traffic production websites to sustain high availability and fast response times.
- Resolved critical core-system defects and optimized data-heavy SQL/Eloquent query patterns to reduce latency under load.

Laravel Developer — Busy Bee Technologies

- Delivered multiple full-cycle custom Laravel applications from requirements through testing, deployment, and client handover.
- Collaborated in a cross-functional Agile team to translate business logic into maintainable, scalable application components.
- Streamlined production deployment routines and managed environment upgrades across staging and live servers.

PHP Developer — Optimum Tech

- Developed PHP/MySQL backends with optimized raw SQL, normalized schemas, and high data-integrity practices.
- Implemented secure session management, authenticated cookie handling, and role-based access patterns for web applications.

SELECTED PROJECTS

Nilaq — Omnichannel Customer Engagement SaaS

[Laravel 12](#) · [Next.js](#) · [Laravel Reverb](#) · [MySQL](#) · [Twilio](#) · [Meta Cloud API](#) · [Telegram](#) · [Webhooks](#) · [Ploi](#)

- Architected a multi-tenant SaaS inbox inspired by Intercom and n8n: unified conversations, contacts, knowledge base, and a visual workflow builder.
- Built omnichannel messaging across Live Chat, WhatsApp (Meta, Twilio, Infobip), Telegram, Email, SMS, and Twilio Voice, with cross-channel contact identity resolution.
- Implemented a real-time agent inbox (WebSockets), embeddable website chat widget, visitor tracking, typing indicators, read receipts, and CDN-backed media storage.
- Designed an event-driven workflow engine (triggers, conditions, HTTP/API nodes, AI-agent nodes) and production operations on Ploi-managed servers with queue workers and webhook pipelines.

TUSO (Tuco) — Conversational AI Agent & RAG Platform

[Laravel](#) · [REST APIs](#) · [PostgreSQL / pgvector](#) · [Qdrant](#) · [OpenAI](#) · [Anthropic](#) · [Gemini](#) · [Queue Workers](#)

- Built a standalone multi-tenant AI agent with retrieval-augmented generation (RAG), long-term memory, tool execution, human handoff, and usage analytics.
- Designed a production retrieval pipeline: document ingestion, intelligent chunking, embeddings, hybrid search, query rewriting, and vector storage (pgvector / Qdrant).
- Orchestrated multi-provider LLMs (OpenAI, Anthropic, Gemini, DeepSeek, OpenRouter) behind a REST API consumed by Nilaq and third-party applications.
- Implemented agent guardrails, intent classification, fact extraction, async queue-based inference, and organization-scoped API-key authentication.

PMS — Productivity Management System

- Delivered real-time task workflows, employee activity tracking, and secure multi-user collaboration boards for operational teams.

Chunk N Cheese — Restaurant Ordering Platform

- Built a Next.js + Express.js food-ordering application with live order tracking over WebSockets and automated loyalty-point rewards.

EduSphere LMS & Zyro-HRM

- Engineered dual enterprise modules for course distribution, student enrollment, analytics, and core corporate HR processes.

AI Tooling Suite — EditPad, ImageToText, Humanizer, Face Search

- Contributed to high-scale AI web utilities serving essay formatting, paraphrasing, OCR, and plagiarism-detection workloads.

EDUCATION

Bachelor of Science in Information Technology (BSIT) — Government College University Faisalabad (GCUF)
